

Hello,

My Dad has had a Ham radio license for over 60 years and is no longer using the equipment that he owns. He has asked me to help him sell the equipment and I'm attaching a list that includes descriptions with pricing.

I have been lucky enough to have a very qualified local Ham, WA8UNL, greatly help me by evaluating the condition of many of the items. His observations and comments, after inspecting and operating several of the items, are included. All of the items that he has evaluated were initially powered up using a variac, so as not to shock the components with a full, in-rush voltage.

Anyone who is interested in any of the items can contact me by e-mailing me at: DRVJV@Comcast.net. Please include "Ham Radio Equipment" in the subject line.

I look forward to hearing from anyone interested.

Thank you,
David Vaughn
